Volume 129, 1992

Contents

No 1, 1–112

On the mechanism of the thermal tetramerization of phospholes, 1

Cathodic behaviour of long chain aromatic sulfones in low acidic media*, 9

Photochemical transformations of endoperoxides derived from polycyclic aromatic hydrocarbons. VI. Photo-isomerization of 1,4-endoperoxides and of 1,2;3,4-diepoxides derived from 1,4-dimethylanthracenes*, 16

A practical regiospecific synthesis of *ortho*- and meta-hydroxybenzenesulfonic acids*, 25

Synthesis, structure, redox properties, ^{31}P NMR of P(TTF)$_3$, PPh(TTF)$_2$, PPh$_2$(TTF), and its NiX$_2$ complexes (X=Cl,Br), a unique series of phosphines with multiple redox functionalities, 29

Electrochemically synthesized poly(crown-ethers); ^{13}C NMR spectra in the solid state structure determination*, 37

Step insertion of acetone by montmorillonite from liquid phase composite adsorption isotherms*, 43

Enantiocontrolled synthesis of key intermediates for the preparation of AK and AF toxins*, 47

A new short and convergent route to macrodiolides*, 62

Reaction of azides with trimethyl phosphite in the presence of water: a chemoselective synthesis of functionalized phosphoramidates, 71

Is there any electronic delocalization operative in *cis*-1,2-dihydro-1,2-diphosphetes ? Structural comparison of *cis* and *trans*-1,2-dihydro-1,2-diphosphetes, 76

The *ortho* effect in pyridines. Part XI. Substituent effects on basicity of 2- and 4-substituted 3-aminopyridines, 79

Preparation and catalytic activities of the manganese and iron derivatives of BR$_8$TMP and Cl$_{12}$TMP, two robust porphyrin ligands obtained by halogenation of tetramesitylporphyrin, 85

Template-free synthesis of the aluminophosphates H1 through H4, 98

No 2, 113–226

Template effect induced by copper(I): application to the synthesis of catenanes and molecular knots*, 113

ß-Benchrotrenic carbanions. Formation, stabilization and synthetical applications*, 121

The use of X-ray photoelectron spectroscopy, Fourier transform infrared spectroscopy and inverse gas chromatography in the study of acid-base interactions of polymers, solvents and metal oxides, 137

Generation of hydroxyl radicals from 1-hydrosypyridine-2(1*H*)-thione and their application to organic synthesis, 145

A new synthesis of allenes vicinal to a butadiene-tricarbonyle-iron moiety and of α(1,3-diene) allenes*, 151

Lewis acid properties of two-coordinated cations of group 15: study of the formation equilibrium of arsenium-Lewis base adducts, 157

Chiral aldehydo- and hydrazono-acetals: synthesis and diastereoselective addition of organometallics*, 161

Synthesis of both epimers of 8-demethyl Ambrox, 168

Synthesis and reactivity of chiral alkoxyallenes prepared by carbocupration of propargylic acetals*, 171

Enantioselective hydratation of α-aminonitriles with chiral ketonic immobilized catalyst*, 191

Conformation of d^6 carbene complexes in asymmetrical octahedral ligand field, 199

Synthesis of the first tetrathiafulvalenes linked to two electron acceptors: possible model compounds for intramolecular charge transfer, 205

Electrochemical reduction of iron(III)-1,3-dicarbonyl compounds complexes in a non aqueous medium, 209

Theoretical study of the coordination mode of borohydride ligands: Sc(BH$_4$)$_3$(PH$_3$)$_2$ complex*, 216

Electronic properties of transition metal hydrides and polyhydrides, 221

No 3, 227–302

A practical method for N-alkylation of succinimide and glutarimide, 227

Studies of photochemical exciplex intermediates in supersonic jets: complexes of 1- and 2-cyanonaphthalene with olefins*, 232

Synthesis and X-ray structure of the first unsymmetric macrocycle containing three inequivalent phosphorus atoms, 237

Activation of aromatics towards oxygen by oxidative or reductive photosensitization, 242

A thermodynamic study of chelation of tervalent lanthanoids with 5-hydroxy-1,4-naphthoquinone in aqueous dioxane medium, 247

A synthetic approach to a lipid A analogue using a *N*-allyloxycarbonyl-D-glucosamine donor and a *N*-allyloxycarbonyl-D-glucosamine acceptor*, 253

Surfactant liquid membranes applied to nickel extraction*, 259

Influence of nitro group on the selectivity of the dialkylation of carbonyl derivatives by 1,8-bis(trimethylsilyl)octa-2,6-diene, 265

Factors affecting stability and equilibrium of free radicals. XIX. Spin distribution in 1-cyano-2,2-bis(3,5-di-*t*-butylphenyl)hydrazyl and its 1-^{15}N-congener, 270

Influence of several parameters on the stereoselectivity of the 1,3-dienes synthesis through carbopalladation of allenes*, 273

Cohalogenation of α,ß-unsaturated ketones*, 280

Synthesis of vinylboronates ß-substituted by an electron withdrawing group: a new class of electron poor olefins, 285

Bromination at carbon and bromine to magnesium exchange in some 2-bromophosphinines, 291

Flow cell electrosynthesis of *o*-substituted nitrobenzenes. *In situ* reaction with sulfinic acids. Attempt to prepare heterocycles, 295

---

* Articles in French

No 4, 303–418

An improved synthesis of nauclefine*, 303

ω-Azidoalkyl triphenylphosphonium bromides as 1,3-dipoles*, 308

Novel perfluoroalkylated cationic amphiphiles derived from 1-monotosylate and 1-monobromoacetate of 2-F-alkyl ethane-1,2-diols. I*, 315

Synthesis and reactivity of seventeen-electron iron(III) methyl complexes, 319

Crowded iron hydride complexes: X-ray crystal structures of $[Fe(C_5H_5)(dppm)(H)]$ and of $[Fe(C_5H_5)(PPh_3)_2(H)]$, and their correlation with the distinction of the methylene proton in the dppm ligand by NMR, 329

A thermodynamical evaluation of the chelate effect. Influence of the metallic cation nature*, 335

Electrochemical reduction of *o*-nitrophenylhydrazides into 1,2,4-benzotriazines*, 343

Donor-acceptor interactions in heterogeneous catalysts*, 353

Potentially biological agents: synthesis and reactivity of thienopyrrolo[1,4]diazepines 1,4-diazepinone substituted 1-thienylmethylpyrrole, 1,3,4-oxadiazole*, 360

Synthesis and reactivity of diazomethylenephosphoranes ($\equiv P=C=N_2$), 367

A study of the chemical and physical properties and of the stability of a paramagnetic complex: FeTTMP*, 376

Free radical cyclization approach to the hexahydrobenzofuran moiety of avermectins: a model study, 387

Alkoxymethyl vinyl tin compounds: ^{13}C NMR as an efficient structural analysis method, 401

Electrochemical reduction of 3,5-dicyano-2,6-dimethyl-4-(*o*-nitrophenyl)-1,4-dihydropyridines in protic medium*, 406

N°5, 419–542

Historical article: Hydrogénation des carbures incomplets en présence de divers métaux divisés (*Bull Soc Chim Fr*, 1901, 25, 671-684), 421

Reaction of phenyl- and alkoxycarbonylmethanesulfonyl fluoride with activated haloalkanes, 435

Substituted propargylic sulfoxides: synthesis and [2,3]-sigmatropic rearrangement in the presence of thiophilic reagents*, 440

Biotin biosynthesis: synthesis of the postulated intermediate*, 457

Use of polymer-bound 4-dialkylaminopyridines in peptide synthesis*, 463

Directionality and stereodivergent aldol additions, 468

Stereochemical studies of Michael-adducts obtained by reaction of the ethyl mercaptoacetate with substituted propenones and of their cyclisation into ethyl 3-hydroxytetrahydrothiophene-2-carboxylates*, 478

Preparation and synthetic uses of a 2-lithiophosphole, 486

Diels-Alder reaction of 2,5-dimethylpyrrole derivatives in the aqueous phase*, 490

Characterization and catalytic properties of USHY zeolite modified with niobium*, 496

Supported catalysts in alkoxylation of substituted aromatics*, 501

The *ortho* effect in pyridines. Part XII. Substituent effects on basicity of 3-substituted 2- and 4-aminopyridines, 509

Synthesis of electroreducible amphiphilic molecules. Electrochemical study of ω-(4-acetylphenoxy)alkyl sulfates in an aprotic medium*, 513

Purine cytokinines in the synthesis of 2',3'-dideoxynucleosides, 523

Fluorinated amino acids: the mechanism of the α-bromo-γ-fluoro-α,ß-unsaturated ester amination with ammonia in DMSO, 529

No 6, 543–694

Historical articles: Description d'un nouveau four électrique (*Bull Soc Chim Fr*, 1893, 178, 953-955). Préparation au four électrique d'un carbure de calcium cristallisé ; propriétés de ce nouveau corps (*Bull Soc Chim Fr*, 1894, 194, 1002-1007), 545

Synthesis of azetidine, pyrrolidines and piperidines by intramolecular cyclization of ω-azidoboranes*, 554

A simple preparation of 1*H*-1,4-diazepine-7(6*H*)-thiones and their ring contraction to 1-vinyl-2,3-dihydro-3*H*-imidazole-2-thiones by thermal rearrangement reactions, 566

Formation of quinones, indanones and furans by the reaction of molybdenum carbene complexes with alkynes, 579

Enantiometrically pure 3-amino-2-hydroxy and 5-amino-4-hydroxy acids from D-isoascorbic acid, 585

The synthesis and characterization of metal derivatives of the new, conveniently prepared bulky thiolato ligand HSC_6H_2-2,4,6-Ph_3, 594

Synthesis and characterization of the binuclear μ-fluorotin(II) amides $[Sn(\mu\text{-}F)NR_2]_2$ $[NR_2 = NC(Me)_2(CH_2)_3CMe_2]2$ 1 or $N(SiMe_3)_2$ 2]; low temperature solution NMR spectroscopic studies and the X-ray crystal structure of *trans*-1, 599

Total synthesis of (5*R*,6*S*)-, (5*S*,6*S*)- and (11*R*,12*S*)-DIHETEs from chiral tricarbonyl (η^4-butadientyl) iron (0) complexes*, 605

Reactions of rhenium halide complexes $(\sigma^5\text{-}C_5H_5)Re(NO)(PPh_3)(X)$ and organocopper nucleophiles; new routes to racemic and optically active hydrocarbyl complexes $(\sigma^5\text{-}C_5H_5)Re(NO)(PPh_3)(R)$, 625

Synthesis, crystal structure and reactivity of (μ^3-n^2-7-oxabicyclo [2.2.1]hept-5-yn-2-one)- nonacarbonyldihydridotriruthenium and (μ^3-n^2-7-oxabicyclo[2.2.1]hept-5-yn-2-one)- hexacarbonyldihydridotris (triphenylphosphine)triruthenium, 632

Inhibitors of HIV-1 proteinase. Substrate analogues containing substituted aminobenzoic acids as proline mimics, 642

Multiple bonds between transition metals and main group elements. Dirhenium heptoxide: revisited structural and degradation chemistry, 655

Synthesis of siloxane-substituted heterobimetallic Fe-Pd, Fe-Pt and Fe-Re complexes, 663

Dehydrogenative double silylation of acetylenes with bis(hydrosilane) compounds, 667

Synthesis, reactions and X-ray crystal structure of $Co_2(\mu\text{-}Ph_2PCH_2PPh_2)_2(CO)_4$ and $Co_2(\mu\text{-}Ph_2PCH_2PPh_2)_2(\mu\text{-}CO)_2(CO)_2$, 676
